Computer Science Student — Full-Stack Developer — Python Backend Developer

CAREER OBJECTIVE

Computer Science undergraduate passionate about software engineering and backend development, with experience building scalable full-stack applications, RESTful APIs, CI/CD pipelines, and automated testing. Seeking an opportunity to contribute to innovative engineering teams while continuously expanding technical and problem-solving capabilities.

EDUCATION

• Pranveer Singh Institute of Technology (PSIT Kanpur) <i>Bachelor of Technology - Computer Science; CGPA: 7.6/10</i>	Kanpur, Uttar Pradesh, India 2024 – 2028
• Archies Higher Secondary <i>Class XII; Percentage: 81.4%</i>	Kanpur, Uttar Pradesh, India 2022 – 2023
• Archies Higher Secondary <i>Class X; Percentage: 95.5%</i>	Kanpur, Uttar Pradesh, India 2020 – 2021

TECHNICAL SKILLS

- **Programming Languages:** Python, C, C++, JavaScript, HTML5, CSS3
- **Frameworks & Libraries:** FastAPI, React, Node.js, Express.js, SQLAlchemy, Tailwind CSS, Bootstrap, Axios, Vite
- **Databases & Caching:** PostgreSQL, MongoDB, Redis
- **Core Competencies:** Data Structures & Algorithms, OOPs, Full-Stack Development, RESTful API Development, Database Design & Optimization, JWT Authentication & Authorization, Responsive Web Design, Software Testing (Vitest, React Testing Library, pytest), Git/GitHub, Agile Development
- **Tools:** Git, GitHub, Postman, Redis, Docker

PROJECTS

- **BuildMate – Full-Stack Project Collaboration Platform**
FastAPI, React, PostgreSQL, Redis, SQLAlchemy, JWT
 - Engineered a full-stack project collaboration platform serving 10+ student teams with secure JWT authentication and granular role-based access control across 3 tiers.
 - Built an intelligent matching algorithm ranking teammate recommendations weekly, improving match accuracy by 42% through iterative refinement.
 - Designed and implemented 15+ RESTful API endpoints using FastAPI/PostgreSQL; optimized queries via Redis caching, achieving an 84% response time improvement (2.1s → 340ms) and reducing database load by 65%.
 - Established a CI/CD pipeline with 260+ automated test cases (Vitest/React Testing Library) achieving 87% code coverage, reducing deployment bugs by 78%.
 - Live: build-mate-delta.vercel.app | GitHub: github.com/aditiT09/BuildMate

ACHIEVEMENTS & CERTIFICATIONS

- **HackerRank – Software Engineer Certification:** 2026
- **JPMorgan Chase Software Engineering Job Simulation:** 2026
- **HackerRank Achievements:** C++ (5 stars), Problem Solving (4 stars)
- **Web Development:** Udemy Certification, 2025

CO-CURRICULAR & EXTRA-CURRICULAR

- **E-Summit 2024, IIT Kanpur:** Gained exposure to industry and entrepreneurship trends.
- **AI Bootcamp:** Attended a 5-day bootcamp on Artificial Intelligence.
- **AI Agents: Vibe-Coding Course with Google:** 5-day intensive course via Kaggle.
- **Video Editing:** DaVinci Resolve, for creative thinking and portfolio documentation.
